

NEW EFFICIENT LITHIUM BATTERIES FOR ELECTRIC VEHICLES

The EU project **ASTRABAT** will develop a new **all-solid-state Lithium-ion battery** for the electric vehicle market.

The goal is to fulfil the need for a safe, high-energy, sustainable and marketable **battery for electric mobility** that could be manufactured in Europe on a massive scale and **help the EU reduce its green-house gas emissions**.

The new ASTRABAT battery cells will enable:
